

how to use them, then we can tune ourselves to the Divine. Our Divination can become very accurate.

How to sharpen our inner senses? The first and foremost requirement to go *within* is desirelessness. If our mind is desiring, we cannot move within. Our desires can make us self-centered and egotistic. Deeper truths of existence cannot be revealed to us. To become an accurate divination channel, we have to conquer our ambition, ego, power, lust, etc. and become totally empty. So that we can reflect the Divine Will.

When we become completely empty, be a witness or a 'dhrista', without being judgemental, then even the

elements of existence, like air, water, earth and ether reveal secrets to us. Existence can reveal so many secrets. So open your hearts to these forces.

There are even some holy spirits, who exist in bodiless form, who are waiting for the right womb. These spirits are not absolutely enlightened but they know many things. If you are silent, and turn inwards these invisible guides can contact you and reveal many things. Be open, unafraid and ready to receive their guidance.

Through meditation only one can achieve this silence and receptivity. So whenever you are free, close your eyes and turn inwards. Become completely empty and receptive without any expectation. A day will come when you will become like an empty mirror, which reflects the Divine Will.

Life line runs to different destinations!

By G.S. Mohan Viswanathan

THE line of life is never absent on a palm, as it is one of the three primordial lines, the other two being the line of Head and the line of Heart. Neither a long Life line guarantees longevity nor a short one portends an early death. Many palmists are astonished to find short lines of life in the hands of people who have already crossed 80 years of age. A good line of Mars and well-set rascettes make up for the deficiencies of a short, broken or barbed line of life. Vital issues like marriage or longevity need to be studied by comparing the other lines, mounts and signs in both the palms.

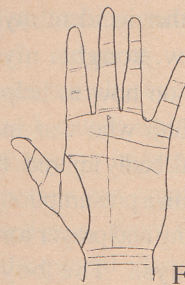

Fig. 2

Fig 2:

Forks, Tridents, Stars and crosses at the termination of a long line of life warn the subject of difficulties during old age.

Fig 3:

Crescent-shaped twin line of Life (called Gemini line) is a sign of extra-ordinary vitality, endurance and intelligence. If found in the palms of sport-persons it may take them to great heights, even to Olympic honours. It makes indelible mark on the hands of self-made people.

Fig I

The line of life beginning under the Mount of Jupiter and coming out in a large Circle around the Mount of Venus promises good longevity.
